Hiring Team
InBounce
San Francisco, CA

Dear Hiring Team,

I'm writing to apply for the AI Research Intern position. I'm an Engineering Technology student at San José State University, concentrating in Computer Network System Management with a minor in Business. I hold a 3.96 GPA and the CompTIA Security+ certification, and I'm pursuing SJSU's Human-Centered Artificial Intelligence Certificate. I can commit about 15 hours a week starting in November.

My interest in AI comes from using it to build things. This past summer I built an IT helpdesk triage agent for the Google/Kaggle Generative AI Intensive Capstone. It uses Google ADK and the Gemini and OpenAI APIs to sort test tickets into auto-resolve, escalation, or human review, and it resolved 12 of 20 tickets and escalated the other 8. I also built a Security+ study site with an in-browser AI study assistant, developing it in public with Claude as my coding partner. Working with different AI tools every week has taught me how to compare them, where each one is strong, and where each one fails, which is the evaluation work your posting describes.

Research is mostly about turning what you find into a clear conclusion. I documented every project with a written README, and for each one I wrote down what I tested, what broke, and what I changed. I also screened my triage agent for prompt injection before any text reached the model, so I look at an AI tool's risks as well as its promise. That habit would help with the comparative analyses and recommendations you ask for.

The entrepreneurial side appeals to me too. I've spent two years at SAP Center coordinating events of up to 17,000 attendees and training more than 15 new hires, and my business minor has me thinking about how a tool becomes a product. I don't have healthcare or cognitive science research experience yet, but I'm curious about how AI can support learning, memory, and reasoning, and I'd be glad to learn it on the job. I'm comfortable working independently and interviewing professionals when the research calls for it.

Thank you for considering my application. My resume is attached, and I'd welcome the chance to talk.

Sincerely,

Jared Lomeli
