Time Management

TECH 15 Assignment #7 | Jared Lomeli

Part A: Summary

Time management is the practice of deciding and planning ahead of how you spend your time during the day. The goal is to allow the important tasks to get completed first since you cannot add more hours to a day. This can be done through making spreadsheets, finding ways to save time and be more efficient, or just waking up earlier and staying up longer (to give yourself more time for a specific day). Some benefits of time management are that when done correctly, it makes you more efficient with your time and therefore less stressed about deadlines. This also allows you more time to study and get better grades on your homework and tests. In addition, it forces you to have more focused working sessions which leads to faster completion of work and more free time afterwards. When time management is focused on healthier habits it can lead to a more healthy lifestyle with better sleep schedules and eating schedules.

Some essential time management skills include setting goals for yourself day-by-day including giving yourself deadlines ahead of the true deadlines in case delays occur. Prioritizing important tasks at the beginning of the day is a skill that I use to ensure I get all my important tasks completed for the day. Allowing yourself to have distraction-free study/working sessions allows for higher quality work and faster completion of work. Finally, the ability to be flexible and adjust your plan when unexpected events occur is crucial when working with time management. This goes back to my strategy of setting deadlines for tasks before the true deadline to allow myself a buffer.

Weekly Time Log: Thursday Oct 1 to Monday Oct 5, 2026

TECH 15 Assignment #7, Part B | Jared Lomeli | Half-hour slots from 5:30 am to 2:00 am

	Thu Oct 1	Fri Oct 2	Sat Oct 3	Sun Oct 4	Mon Oct 5
5:30	Commute to gym	Get ready	Sleep	Sleep in (8 hrs total)	Commute to gym
6 am	Gym / basketball (6 am)	Submit Ch 4 HW	Get ready		Gym / basketball (6 am)
6:30		Breakfast	Breakfast		
7 am	Get ready	Pack car, leave	GitHub Wk 2: Markdown + review PRs		Get ready
7:30	Breakfast	Drive to the show with dad			Breakfast
8 am	BUS2 90 Ch 4 homework			Get ready	Submit TECH 65 CYU + PT
8:30				Breakfast with dad	
9 am	Prep: 4-yr plan + questions		Morning and lunch with dad		SJSU classes (advising at 10:00)
9:30	Advisor Zoom (4 questions)			GitHub Wk 1 terminal: branch, commit, merge, push	
10 am	Finish Ch 4 HW				
10:30	SJSU class (10:30 to 11:45)	Check in		Check out, pack	
11 am		Lunch with dad		Drive home with dad	
11:30					
12 pm	Commute home	Linux Essentials Ch 8 + 9 in VM			
12:30	Lunch		Tech 60 block diagram + flowchart		Lunch
1 pm	Basketball after school + shower				SJSU classes
1:30					
2 pm		Explore with dad		Lunch	
2:30	GitHub Wk 1: voucher + Intro to GitHub		Portfolio project (SOC Dashboard)	Portfolio project (SOC Dashboard)	
3 pm					
3:30			Free time with dad	Packet Tracer practice (2 hrs)	
4 pm					
4:30	TECH 65 Packet Tracer 9.1.3 + 9.2.9	POLS C1000 (West Valley) reading	Gaming		
5 pm					
5:30	Dinner with family	Dinner with dad	Dinner with dad	Canvas check: week ahead	Dinner
6 pm					SJSU classes until 8:45 pm
6:30	POLS C1000 (West Valley) homework			Update 4-yr plan + ASSIST research
