JC Herrera
CrowdStrike
Austin, Texas, USA

Dear JC Herrera,

I am writing to show my strong interest in the Computer Network Risk Manager position at CrowdStrike. As someone who is deeply committed to cybersecurity, I believe my leadership experience, systems management, and eagerness to learn and grow within the company make me a strong candidate for this role.

While my professional background is limited to my current position at the SAP Center, I consistently look to develop the capabilities that align with the role of being a network risk manager. In my current position as Team Leader/Parking Associate at the SAP Center, I oversee complex logistics, direct traffic flow, and implement inventory controls under high-pressure environments. These responsibilities require constant risk awareness, critical thinking, and clear communication, which are all seen as high values within your organization. I also lead training and employee orientations in order to set standards within the company.

I am currently pursuing a Bachelor of Science in Management Information Systems, and have supplemented my education with self-motivated studies in learning the basics of Artificial Intelligence and cybersecurity principles. I have studied concepts such as incident escalation workflows and IP addressing in order to prepare for this strenuous role. Although I do not yet have the formal education for this position, nor have I had a formal job in cybersecurity, I bring a disciplined work ethic. In addition to my strong organizational skills and willingness to learn on the job, I can guarantee that I will efficiently fill my applied role within your company.

If given the opportunity, I look forward to partnering with other forces within CrowdStrike— such as threat research and engineering— to learn the best actions and practices to benefit the entire workforce. I am also committed to obtaining industry certifications and on-the-job training to further specialize in areas such as NIST frameworks, vulnerability assessment, and security management to grow and become a more valuable asset.

Thank you for considering my application. I would be grateful for the opportunity to work among the specialists who are involved with CrowdStrike. If possible, I would enjoy the opportunity to discuss how my leadership, technical knowledge, and passion for cybersecurity align with the needs of your risk team.

Sincerely,
Jared Lomeli
