SUMMARY

Engineering Technology student at SJSU specializing in Computer Systems Network Management, with hands-on experience in enterprise network design, offensive/defensive security labs, and AI agent development. Pursuing CompTIA Security+ (SY0-701, target: August 2026). Seeking an IT Support, Network/NOC, or SOC Analyst internship to contribute technical skills and a self-directed learning mindset to a real-world team.

EDUCATION

San José State University — San Jose, CA
Bachelor of Science in Engineering Technology, Computer Systems Network Management
Upcoming Coursework (Fall 2026): Introduction to Networks, Python Programming, Electronics

Expected June 2029

Pioneer High School — San Jose, CA
High School Diploma • GPA: 3.86 Unweighted / 4.06 Weighted • Honors Graduate

June 2025

TECHNICAL SKILLS

Networking & Security: VLANs, Layer-3 switching, ACLs, AAA/RADIUS authentication, IDS, IPSec VPN, DHCP, subnetting, TCP/IP, OSI Model, firewalls

Programming & AI Development: Python (scripting, FastAPI, REST APIs), Gemini API, Google AI Studio, multi-agent framework design

Security Tools & OS: Kali Linux, Metasploitable, Wazuh SIEM, Cisco Packet Tracer, Nmap; Windows & Linux (CLI, file systems, permissions)

Security Concepts: CIA Triad, authentication & access control, threat & vulnerability management, defense-in-depth, log analysis, incident detection

CERTIFICATIONS & TRAINING

- **CompTIA Security+ (SY0-701)** — In Progress (target exam: August 2026)

PROJECTS & SELF-DIRECTED LEARNING

Segmented Enterprise Network — Cisco Packet Tracer Lab (Security+ Domains 3–4)

- Designed and deployed a three-VLAN enterprise network (Management/IT, Employees, Servers/Wireless) with Layer-3 switching, inter-VLAN ACLs, and a site-to-site IPSec VPN to simulate secure distributed connectivity.
- Implemented AAA/RADIUS authentication, IDS, centralized syslog, and a honeypot to enforce defense-in-depth principles aligned with CompTIA Security+ SY0-701 Domains 3–4.
- Repo: github.com/jaredlomeli-sjsu/packet-tracer-security-plus-lab

Multi-Agent Helpdesk System — Google/Kaggle 5-Day AI Agents Intensive

- Built a production-style multi-agent customer support system in Python using FastAPI and Google's Gemini API, with supervisor and helpdesk agent roles, stateful conversation handling, and REST API endpoints for frontend integration.
- Repo: github.com/jaredlomeli-sjsu/google-kaggle-5day-intensive

Offensive/Defensive Security Lab — VirtualBox + Kali Linux

- Configured an isolated virtual lab (Kali Linux attacker, Metasploitable target) to practice enumeration, exploitation, and post-exploitation techniques mapped to Security+ SY0-701 threat domains.
- Deployed Wazuh SIEM to ingest and correlate attack-generated log data, practicing alert triage and incident detection workflows.

EXPERIENCE

Parking Attendant / Team Mobile — SAP Center at San Jose, San Jose, CA

Nov 2023 — May 2026

- Operated PCMS digital signage systems and two-way radio communications to coordinate real-time traffic flow for events serving up to 17,000 attendees.
- Led onboarding of new attendants on standard operating procedures, technology systems, and customer service protocols, improving team consistency and reducing ramp-up time.
- Resolved guest issues on-the-spot under time pressure, applying clear communication and calm decision-making in a fast-paced, high-stakes environment.

ACTIVITIES & HONORS

- Member, SJSU Network Engineering Technology Society (NETS)
- Taekwondo Black Belt — multi-year commitment demonstrating discipline and consistent goal achievement
- Pioneer HS Honors Graduate (GPA: 3.86 / 4.06 Weighted) • Languages: English (Native)
