PROJECTS & SELF-DIRECTED LEARNING

Segmented Enterprise Network — Cisco Packet Tracer Lab

- Designed a three-VLAN enterprise network (Management/IT, Employees, Servers/Wireless) with Layer-3 switching, inter-VLAN ACLs, and a site-to-site IPsec VPN.
- Implemented AAA/RADIUS authentication, IDS, centralized syslog, and a honeypot to enforce defense-in-depth.

Nexus Technologies IT Helpdesk Triage Agent — Google/Kaggle 5-Day Generative AI Intensive Capstone

- Built a multi-agent IT helpdesk triage system on Google ADK 2.0 with a custom MCP tool server — routes tickets to auto-resolve, security escalation (prompt-injection/phishing screening pre-LLM), or human review by two Gemini agents; covered by 17 unit tests, no API key required.

Offensive/Defensive Security Lab — VirtualBox + Kali Linux

- Built an isolated Kali/Metasploitable lab and completed 15 exercises across the 5 Security+ domains and a Wazuh SIEM bonus track, spanning enumeration, exploitation, and post-exploitation.
- Deployed Wazuh SIEM to detect and correlate attacks, including brute-force detection and File Integrity Monitoring (FIM), practicing alert triage and incident response.
