SUMMARY

Engineering Technology student at SJSU specializing in Computer Network System Management, with hands-on experience in enterprise network design and offensive/defensive security labs. CompTIA Security+ certified, seeking an IT Support, Network/NOC, or SOC Analyst internship.

EDUCATION

Bachelor of Science (B.S.) in Engineering Technology Expected June 2029

Concentration in Computer Network System Management, Minor in Business Management

San José State University, San Jose, CA

Cumulative GPA: 3.97 • Dean's Scholar

Planned College Courses (Fall 2026): Introduction to Networks (TECH 65), Introduction to Python Programming (TECH 30), Introduction to Electronics (TECH 60), Introduction to Engineering (ENGR 10)

TECHNICAL SKILLS & CERTIFICATIONS

Networking & Security: VLANs, Layer-3 switching, ACLs, AAA/RADIUS authentication, IDS, IPsec VPN, DHCP, subnetting, TCP/IP, OSI Model, firewalls

Coursework Skills: Python programming (TECH 30), Circuit design & building (TECH 60)

Security Tools & OS: Kali Linux, Metasploitable, Wazuh SIEM, Cisco Packet Tracer (TECH 65), Nmap; Windows & Linux (CLI, file systems, permissions)

Certification: CompTIA Security+ ce (SY0-701) — CompTIA • Issued July 2026 • Valid through July 2029

PROJECTS & SELF-DIRECTED LEARNING

Segmented Enterprise Network — Cisco Packet Tracer Lab

- Designed a three-VLAN enterprise network (Management/IT, Employees, Servers/Wireless) with Layer-3 switching, inter-VLAN ACLs, and a site-to-site IPsec VPN.
- Implemented AAA/RADIUS authentication, IDS, centralized syslog, and a honeypot to enforce defense-in-depth.
- Repo: github.com/jaredlomeli-sjsu/packet-tracer-security-plus-lab

Offensive/Defensive Security Lab — VirtualBox + Kali Linux

- Built an isolated Kali/Metasploitable lab and completed 15 exercises across the 5 Security+ domains and a Wazuh SIEM bonus track, spanning enumeration, exploitation, and post-exploitation.
- Deployed Wazuh SIEM to detect and correlate attacks, including brute-force detection and File Integrity Monitoring (FIM), practicing alert triage and incident response.
- Repo: github.com/jaredlomeli-sjsu/linux-learning/.../kali-metasploitable-wazuh-linux

EXPERIENCE

Parking Attendant / Team Mobile — SAP Center, San Jose, CA

Nov 2023 — May 2026

- Operated PCMS digital signage and two-way radio communications to coordinate real-time traffic flow for events of up to 17,000 attendees.
- Led onboarding of new attendants on standard operating procedures, technology systems, and service protocols, improving team consistency and reducing ramp-up time.
- De-escalated guest issues on the spot, maintaining smooth operations during high-attendance events.
