Hiring Team
Muon Space
Mountain View, CA

Dear Hiring Team,

I'm writing to apply for the Junior Help Desk Intern position for Summer 2027. I'm a Computer Network System Management student in the Engineering Technology program at San José State University with a 3.97 GPA, and I hold the CompTIA Security+ certification. I'm available to work full-time on-site in Mountain View from May through September, and I'd like to spend the summer supporting the people building Muon's satellites.

The first job of a help desk is to be the person staff can turn to when something stops working, and to stay patient and clear with people who aren't technical. At SAP Center, I coordinated traffic for events of up to 17,000 attendees using digital signage and two-way radio, and I trained more than 15 new attendants on our procedures. I cut their ramp-up time from four shifts to two by having them do the tasks while I supervised. Explaining a process to someone new, calmly and in the middle of a busy shift, is the skill I'd bring to your employees.

On the technical side, I've been building the kind of knowledge a help desk uses every day. I designed a segmented network in Cisco Packet Tracer with VLANs, DHCP, ACLs, and a site-to-site VPN, and I tested connectivity across every zone, which is the same layer-by-layer approach I'd use on a network connectivity ticket. I'm comfortable administering Windows and Linux from the command line, including file systems and permissions. I also built an IT helpdesk triage agent that sorts test tickets into auto-resolve, security escalation, or human review, so I understand how a good ticket queue and a clean escalation path work.

Your posting mentions maintaining asset records and documentation. I treat documentation as part of the job. Each of my projects has a written GitHub README with network diagrams, IP tables, and configuration steps, so that someone else can follow what I did and reproduce it.

I'm organized, reliable, and eager to learn from your senior IT staff. Thank you for considering my application. I would welcome the chance to talk about how I can help your team this summer.

Sincerely,

Jared Lomeli
