Hiring Team
SEMI
Milpitas, CA

Dear Hiring Team,

I'm writing to apply for the Intern, IT Applications & Support position at SEMI. I'm a Computer Network System Management student in the Engineering Technology program at San José State University with a 3.97 GPA, and I hold the CompTIA Security+ certification. The 20-hour-a-week schedule fits well with my classes, and I'm interested in the chance to grow into a longer-term role with your IT Operations team.

Help desk work comes down to troubleshooting methodically, documenting what you did, and keeping the person on the other end informed. I've practiced that on my own. I built an IT helpdesk triage agent that routes test tickets to auto-resolve, security escalation, or human review, and it handled 20 test tickets, resolving 12 and correctly flagging 8 for escalation. I also run a home lab with Kali Linux, Metasploitable, and a Wazuh SIEM, where I work through alerts and write up what happened. I'm comfortable administering Windows and Linux from the command line, including file systems and permissions.

The posting mentions Wi-Fi, VPN, and network support, and that's the area I know best. I designed a segmented enterprise network in Cisco Packet Tracer with VLANs, inter-VLAN ACLs, AAA/RADIUS authentication, and a site-to-site IPSec VPN, then tested connectivity and access rules across every zone. Working through those configurations is where I learned to isolate a problem layer by layer instead of guessing.

At SAP Center, I coordinated traffic for events of up to 17,000 attendees using digital signage and two-way radio, and I trained more than 15 new attendants on our procedures. I cut their ramp-up time from four shifts to two by having them do the tasks while I supervised. That taught me to be patient and clear with people who are new to a system, which is what supporting users and writing good documentation both require.

I'm a quick learner, I take follow-through seriously, and I'd like to build my experience supporting a team like SEMI's. Thank you for considering my application. I would welcome the chance to talk about how I can help.

Sincerely,

Jared Lomeli
